

As the Neuromuscular Therapist for the Miami HEAT, I've been using the products for about a year now with more than favorable results. One example occurred recently during Training Camp at the start of the 2022-23 season. One of my athletes presented with extremely sore and fatigued hamstrings, which is common this time of year. I applied the spray pre massage. The next day, the athlete reported no soreness and felt great. I look forward to continued use and results.

Sincerely,

Vincent A. Aquilino
